MAP OF GUATEMALA

Reduced from the Survey in the Archives of that Country.

1826.

London, Published Jany 13. 1826 by A. Arrowsmith, Hydrographer to His Majesty N° 10 Soho Square.

NOTE

Although this Map contains much information of the interior parts of the country hitherto unknown in Europe, it has little pretention to scientific arrangement; the original Survey however having been followed throughout, it may be said to convey a just idea of the present state of Geography in Guatemala.
